

Government, Defense & Industrial Visualization

Capability Statement

Steel Core Creative delivers cinematic animations and real-time visualization, simulation environments, and industrial presentation systems using 3D applications and Unreal Engine workflows. Focused on maritime, infrastructure, logistics, industrial modernization, and defense-focused visualization initiatives.

CORE CAPABILITIES

- Real-Time Visualization & Simulation
- Unreal Engine Presentation Systems
- Maritime & Shipyard Visualization
- Government & Defense Visualization
- Executive Briefing Visuals
- Infrastructure Modernization Concepts
- Cinematic Animation & Walkthroughs

DIFFERENTIATORS

- 20+ years of professional visualization experience
- Specialized in industrial and maritime environments
- High-end cinematic presentation quality
- Real-time Unreal Engine workflows
- Government and defense-adjacent project experience

Relevant Experience

Valstad Shipworks — Large-scale shipyard visualization environments focused on industrial modernization, manufacturing flow, crane systems, and executive presentation systems.

USMMI — Maritime replenishment and operational visualization support for presentation and briefing workflows.

Maritime & Industrial Visualization — Real-time Unreal Engine environments supporting stakeholder communication, modernization concepts, and industrial visualization initiatives.
